DESCRIPTION

Extron **Cable Cubby**® enclosures provide inconspicuous access to A/V, power, data, and video connections, including Extron Architectural Adapter Plates (AAPs). With a variety of surface finishes available, the Cable Cubby is designed to mount discreetly into virtually any tabletop surface. The Cable Cubby enclosures fit nearly flush with the tabletop when closed and remain unobtrusive, even when in use.

Cutouts in the lid enable cables to be run in or out of the Cable Cubby's base with the lid closed. Most models are equipped with a square bezel with the exception of the Cable Cubby 300C which has a circular bezel, enabling it to be installed in three easy steps using a standard 6-inch hole saw.

Within its base, the Cable Cubby enclosure offers adjustable panels with three different sized holes to support a variety of cable diameters. On all models except the Cable Cubby 200, the adjustable panels can be raised or lowered to suit cable lengths and connector types. Any of the hundreds of Extron optional AAPs can be inserted adjacent to the panels. AAPs include passive and active pass-through connection points, as well as control modules.

Cable Cubby enclosures include one or two unswitched AC power outlets for additional power support (Australia, UK, France, Israel, India, and Central Europe models have one; USA and Switzerland, models have two).

FEATURES

- Low profile design with sliding door that can be stored out of sight when in use (Cable Cubby 300, Cable Cubby 600, and Cable Cubby 800 only)
- One or two unswitched AC power outlets
- Hundreds of AAP options for active or pass-through connectivity
- Available in black anodized or brushed aluminum finish* (Cable Cubby 300, Cable Cubby 600, and Cable Cubby 800 only)
- UL/CUL listed and CE compliant for worry-free integration, system inspections, and product safety
- Circular models can be easily installed using a standard 6 inch hole saw
- International models include UK, Australia, Central Europe, Switzerland, France, Israel, or India AC power outlets.

*Polished aluminum finish and brushed brass finish are also available. These models are built to order and require a longer lead time. Contact an Extron Customer Support Representative for more information.

NOTE: Cables and Architectural Adapter Plates (AAPs) are shown in the photos and diagrams above as examples only. Cables and AAPs are optional accessories for the Cable Cubby products and must be ordered separately.

INSTALLATION

Cable Cubby 300C

Preparation of the table surface is simple. For installation of the Cable Cubby 300C, a standard 6-inch hole saw is used to easily make the necessary cut into the tabletop. The installation is done in three easy steps:

Use standard 6 inch hole saw to cut into table surface.

Place the Cable Cubby 300C into the cutout.

Make all connections and securely fasten Cable Cubby 300C onto table surface.

Cable Cubby 200, 300S, 600S, and 800S

For Cable Cubby models with a square bezel, Extron provides a routing guide free of charge for worry-free installation. Routing guides can be obtained from your Extron Customer Support Representative. Templates and cut-out dimensions can be downloaded from the Extron Web site (www.extron.com). An Extron streaming video I-Demo is available on the Web site that will walk you through the installation process step-by-step, from site preparation to troubleshooting.
