

SNC-CS10P / SNC-CS11P OUTLINE

Make the move from CCTV to network video monitoring with the affordable Sony SNC-CS10P and SNC-CS11P

The Sony SNC-CS10P and SNC-CS11P cameras are designed specifically for high-quality and affordable network-based video monitoring. They combine high performance with value-added features such as built-in activity detection and pre-/post-alarm recording, and also boast a DC Servo Auto Iris Lens capability that makes them ideal for both indoor and outdoor use. Plus, because they are similar in size to CCTV cameras, you can install them using standard camera housings.

Equipped with Sony progressive scan CCDs and advanced DSP technology, these cameras produce high-resolution images and deliver excellent colour reproduction capabilities. They also support both JPEG and MPEG-4 compression formats for great flexibility when configuring your network environment or choosing an application.

For further efficiency and effectiveness in operating your network video monitoring system, these cameras offer a simultaneous access capability, a multicasting feature, and a choice of network security functions such as IP filtering and password protection.

If you want an affordable, feature-rich solution for your network video monitoring and surveillance applications, the Sony SNC-CS10P and SNC-CS11P cameras are a perfect choice. Plus, due to their compact design, you can install them in standard housing.

FEATURES

- Compact and Slim
 - ▶ Design inherited from CCTV cameras
 - Fits standard camera housings
- DC Servo Auto Iris Lens capability ideal for both outdoor and indoor use
- Sony progressive scan CCDs and advanced DSP technology – provides clear and detailed images while maintaining high sensitivity
- Variety of power options: AC 24 V, DC 12 V, or PoE (Power over Ethernet)*1
 - ▶ Easy wiring with PoE (SNC-CS11P only)
- Analogue video output ideal for use when adjusting the camera viewing angle during installation and for local monitoring
- Flange-back adjustment for precise and easy focus settings

- Choice of compression formats: MPEG-4 and JPEG
- Five preset JPEG picture-quality settings with constant bitrate algorithm
 - ▶ Limits data bitrate while maintaining high-quality images
 - Ideal when network bandwidth is limited
 - Useful for calculating the required bandwidth during installation
- Alarm function with activity detection and pre-/post-alarm recording modes
- Bi-directional audio function (SNC-CS11P only)
- Aspherical vari-focal lens eliminates spherical aberration and minimises wide-angle distortion (SNC-CS11P only)
- *1 The SNC-CS10P does not support PoE.
